

# CreaseMaster™ Plus+

Available in 3,600 or 4,600 sheets per hour

Optional strike perf attachment and Impact Perf available for "box" or "T" perms.

- Impact creasing eliminates cracking of digitally-printed substrates during the finishing process.
- Rotary perforations (at the entrance of the machine for accuracy; no tail whip) are anvil style and produce a "burr-free" finish. Microperms are also available.
- Inverted and regular impact creasing in the same pass!
- Up to 10 impact creases per sheet
- Up to 20 jobs can be stored into memory
- Easy-to-use programming. Set up in minutes!
- Vacuum air feed for efficient top loading.

Electrical:	120V/230V, 60/50Hz, 5.0 Amp Pump is 20A
Maximum Speed (impact creasing):	4600 8.5 x 11" sheets per hour *landscape 8.5"x 11", 1 impact crease
Maximum stock size:	18"W x 25.5"L (45.7cm x 57cm)
Minimum stock size:	3.5"W x 5"L (8.9 cm x 12.7 cm)
