HIGH SPEED PLATEN DIE-CUTTER

PDF60 MACHINE FOR MIDDLE AND BIG RUNS,
ALLOWS HIGH PRODUCTION SPEED
AND LOW INVESTMENT COSTS.

Vacuum pile feeder for an accurate registration.
Multiple transportation grippers in the front of the sheet = high and safe production speed.
Working pressure adjusted directly through a touch screen (servo motor).
The laterally removable hot foiling device (like a drawer) speeds up foil changeovers and setups.
Test sheet can be removed without stopping the machine.

TECHNICAL DATA

PDF60

Max sheet size	600x450
Min sheet size	297x210 (A4)
Paper/carton board thickness	80~450 g/m ²
Corrugated board thickness	-
Grippers margin	8 mm/min. (0.35 in)
Max pressure	150 t
Max speed — sheets/h (multipositions/h)	6.500 c/h
Machine dimensions	L2950xW1500xH1800 mm (L116xW60xH70 in)
Machine weight	4 t
